The COVID-19 pandemic has been a trying time for everyone, especially for people with additional day-to-day challenges. The UA-ASD Clinic has continued to support our families through weekly online parent support groups. If you are interested in joining these, please contact the clinic for more information.

Drs. Laura Stoppelbein and Susan White are conducting research to learn more about the experiences of people with autism and their families during COVID-19 pandemic. They are hoping to get information that will help us to better understand how to provide support during these times. If you are interested in participating in this project by completing a survey, please use the QR Code or go to the link below for more information: https://tinyurl.com/copesignup

Social distancing can make it even more difficult to entertain our kids during the summer. Here are some ideas for summer fun at home:

- Have a scavenger hunt in the backyard.
- Make personalized BINGO boards full of your child’s favorite things to play with the family.
- Set up a sprinkler in the backyard for some at-home waterpark fun.
- Design an obstacle course – see how fast you can finish it!
- Build a fort.
